HEBA ALLAH HASHIM

Full-Stack Software Engineer | Python | FastAPI | Vue.js | Next.js

+20 106 270 6792 | hebaallah.hashim68@gmail.com | Cairo, Egypt | hebamuh68 | heba333

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years building production-grade web applications across Python backends (FastAPI, Django) and modern JS frontends (Vue, Next.js, TypeScript). Proven ability to own features end-to-end – from database schema design to deployed UI – across distributed teams in Egypt, Saudi Arabia, Germany, and UAE.

PROFESSIONAL EXPERIENCE

Python Software Engineer

Planning Engineer FZE.

Apr 2026 – Present | Qesm El Maadi, Cairo, Egypt (On-site)

- Own the full product stack end-to-end: desktop client (PySide6/Qt), server-side API (FastAPI), and local embedded PostgreSQL database architecture bundled inside the application.
- Build and maintain data ingestion pipelines parsing Excel, XER, and PDF project files into structured scheduling data, handling edge cases and format variations across real client files.
- Architect the authentication system from scratch: JWT sessions, OTP verification, and device-bound access control to secure multi-user desktop deployments.

Tech Stack: Python, PySide6/Qt, FastAPI, PostgreSQL, Docker, DigitalOcean

Frontend Developer

Mahjoz

Oct 2024 – Jan 2026 | Riyadh, Saudi Arabia (Remote)

- Built and maintained a large-scale SaaS dashboard and e-store using Nuxt with SSR, dynamic product pages, and seamless checkout flows.
- Architected and managed complex state across Pinia stores, handling data flow for bookings, orders, customers, and real-time notifications via WebSockets (Pusher).
- Integrated RESTful API endpoints with typed Axios service layer, implementing token-based auth, error interceptors, rate limiting, and server-side validation handling.

Tech Stack: Vue 3, Nuxt, TypeScript, Pinia, Tailwind CSS, Axios, Vue Router, Vue I18n, Vite, Git

Backend Developer

Buguard

Jul 2025 – Oct 2025 | Cairo, Egypt (Remote)

- Developed and maintained RESTful APIs using FastAPI to support vulnerability scanning and security reporting workflows.
- Built internal security tools with Python for automated vulnerability assessment and report generation.
- Containerized applications with Docker and debugged complex backend issues in production environments.

Tech Stack: FastAPI, Python, Docker, RESTful APIs

UI Developer

RayaGate

Oct 2023 – Jan 2024 | Berlin, Germany (Remote)

- Developed and maintained responsive user interfaces for a Germany-based startup, improving usability and user engagement.
- Led UI design and information architecture enhancements, translating Figma designs into production-ready code.
- Built reusable component library and collaborated with marketing and business teams to align UI with business goals.

Tech Stack: React.js, Tailwind CSS, JavaScript, Figma, Git

EDUCATION

B.S. in Computers and Information

Sept 2019 – Jul 2023

- Grade: 3.23/4 (B+)

PROJECTS

Roof — Full-Stack Rental Platform

- **Description:** Full-stack apartment rental platform with advanced search, real-time messaging, and multi-language support connecting renters and seekers across Egypt.
- **Backend:** Developed RESTful API with FastAPI (40+ endpoints) featuring JWT authentication with refresh tokens, RBAC middleware, Elasticsearch-powered search with SQL fallback, real-time messaging/notifications, rate limiting, and admin dashboard. Designed normalized PostgreSQL database schema with SQLAlchemy ORM and Alembic migrations.

  Technologies: FastAPI, Python, PostgreSQL, SQLAlchemy, Elasticsearch, JWT, Alembic, bcrypt
- **Frontend:** Built responsive SPA with TypeScript, implementing multi-language i18n (5 languages with RTL support), Pinia state management, Vue Router with route guards, real-time messaging UI, admin dashboard, and modern UI with Tailwind CSS.

  Technologies: Vue 3, TypeScript, Pinia, Vue Router, Vue I18n, Tailwind CSS, Axios

Mini Editor — Published npm Package

- Modular rich text editor component with TypeScript, supporting RTL/LTR switching, media uploads, and customizable toolbars. Published as open-source npm package with over **1K** downloads.
- **Tech:** Vue 3, TypeScript, Tailwind CSS, Vite, pnpm

SKILLS

Backend Development

- Python, FastAPI, Django, DRF
- RESTful APIs, Pydantic, SQLAlchemy, SQLModel
- PostgreSQL, MongoDB, MySQL, Elasticsearch
- JWT Authentication, RBAC, OAuth2
- Celery, Redis
- Alembic (Database Migrations)
- Docker, CI/CD
- Git, GitHub, Bitbucket
- Linux, Bash

Frontend Development

- React, Next.js
- Vue 3, Nuxt, JavaScript (ES6+), TypeScript
- Zustand, React Query, Pinia
- Tailwind CSS, Bootstrap, SCSS
- Responsive Design, RTL/LTR Support
- REST API Integration (Axios, Fetch)
- WebSockets
- React Hook Form, Zod
- Figma, Vite, Vercel

LANGUAGES

- English: Fluent conversation and Writing
- Arabic: Mother tongue
